INDOONESE AQUACULTURE JOURNAL
Volume 8 Number 1, 2013

CONTENTS

Influence of dietary phytic acid and phytase on growth, digestibility, and vertebral phosphorus of juvenile Japanese flounder, Paralichthys olivaceus
By: Asda Laining .......................................................... iii-iv

Interaction between dietary mineral and phytase on biological performances of Japanese flounder, Paralichthys olivaceus. Part I. Growth, feed intake, and whole body mineral content
By: Asda Laining, Lideman, and Manabu Ishikawa ........................................... 1-11

The optimal ratio of Nile tilapia (Oreochromis niloticus) and common carp (Cyprinus carpio) for improving productivity on deep water pond
By: Imam Taufik, Sutrisno, and Eri Setiadil ........................................... 13-22

Variability for growth related traits in giant freshwater prawn Macrobrachium rosenbergii at various developmental stages and culture conditions estimated by intraclass correlation
By: Lemo and Rommy Suprapto ........................................... 23-33

Specificity of haemolysin and gyrase gene marker for rapid detection of Vibrio parahaemolyticus in penaeid shrimp
By: Iraq Khatiar Kadriah, Sukenda, Munti Yuhana, Endang Susianingsih, and Muchrjadi Atmomarsono ........................................... 35-45

The study on mangrove litters as a source of nutrients for Blanakan mangrove pond, Subang, West Java
By: Reif Marjadi, Adi Basukiadi, and Muhadiono ........................................... 47-54

Electron microscopic analysis of enlarged cells derived from red sea bream Oncorhynchus mykiss (RSV)-infected cultured grun tin (GF) cells
By: Astut Mahardika ........................................... 55-64

PCR-DGGE method for microflora alteration in shrimp digestive organ following Lactobacillus administration
By: Mursaleh Zafizah, Poh-Shing Chang, and Yu-Chi Wang ........................................... 65-73

iii
Indonesian Aquaculture Journal Vol. 8 No. 1, 2013

Colour quality enhanced on goldfish juveniles through shrimp head meal enriched in feed
By: I Wayan Subamia, Nina Meilisza, and Asep Permana ........................................... 83-91

New megalocytivirus infected to the cultured fresh water giant gourami,
Osphronemus gouramy Lac. in Indonesia
By: Isti Koesharyani and Lila Gardenia ................................................................. 93-99
